Database Development with PL/SQL (INSY 8311)

Q1. Step 1: Problem Definition

Business Context:

Ayera Milk Ltd is a dairy company in Rwanda that sells fresh milk, yogurt, and cheese across different regions (Kigali, Huye, Musanze). The sales department wants to analyze **product performance and customer purchasing behavior**.

Data Challenge:

Even though every sale is recorded, Ayera struggles to identify **top-selling dairy products per region**, track **monthly sales growth**, and **segment customers** for marketing and loyalty programs.

Expected Outcome:

Provide insights into **top products, customer segments, and regional trends** to improve **inventory planning and marketing strategies** and it will help to improve our products and services.
